### Summary

Microsoft has hardened the DCOM requirements in its security update CVE-2021-26414 released on the 8th of June 2021. The hardening changes were disabled by default in this security update, however Microsoft has enabled them by default in Windows 11 and will also roll-out the update to other windows version in Q1 2022.

Customers using FTR Monitor on any version of Windows with this security update (CVE-2021-26414) will not be able to connect to FTR Reporter.

With this release of FTR Gold we address the DCOM requirements for Windows in FTR Monitor and also include other bug fixes for version 7.0 and 7.1. The patch can be applied to any product of Gold version 7.0 and above.

- **Monitor** - Addresses the DCOM requirements of Windows security update CVE-2021-26414.
- **Manager** - Addresses an issue where save a copy fails when the source content is present on a network share with poor network connectivity.
- **Manager** - Addresses an issue where the reformat fails when the source content is present on a network share with poor network connectivity.
- **Player** - Addresses an issue in in the playback of contents present on a network share with poor connectivity.
- **Player** - Addresses an issue where Save a Copy fails when the source content is present on a network share with poor network connectivity.
- **Player** - Enables FTR Player to remember last video window position, size, and mode.
- **Reporter, Reporter Server and Monitor** - Addresses an issue where the windows event log does not accurately indicate who stopped the recording during remote monitoring. It is important to run the patch on both Monitor and reporter/reporter server.
- **Reporter Server** - Enables compatibility between Reporter Server 7.0 and Monitor 7.1.
