Latest patch for Monitoring Suite 6.3

Version(s):	**6.3**
Release Date (target):	01-Nov-2021
Target audience:	All the customers using Monitoring Suite 6.3
Components affected:	FTR Gold Monitoring Suite
OS supported:	• Windows 7 32 and 64-bit • Windows 10 32 and 64-bit
Patch	https://ftr-products.s3.ap-southeast-2.amazonaws.com/FTR+Gold+6/6.3/FTR+Gold+Monitoring+Suite+Patch+6.3.10.zip

Summary

Microsoft has hardened the DCOM requirements in its security update CVE-2021-26414 released on the 8th of June 2021. The hardening changes were disabled by default in this security update, however Microsoft has enabled them by default in Windows 11 and will also roll-out the update to other windows version in Q1 2022.

Customers using FTR Monitor on any version of Windows with this security update (CVE-2021-26414) will not be able to connect to FTR Reporter.

With this release of FTR Gold we address the DCOM requirements for Windows in FTR Monitor and also include other bug fixes for version 6.3.

- Addresses the DCOM requirements of Windows security update CVE-2021-26414 in FTR Monitor.
- Log sheets will be saved in the path defined in Departments.xml without adding a sub-folder when jurisdiction is enabled.
- Addresses the issue where pressing Enter key to select a recorder on the Recorder pane empties the whole pane.
- Addresses the issue where Log Notes does not gain focus automatically after tag hearing is inserted into the log note.
- Addresses the issue where the auto-correct option in spellchecker is deselected during initialization. With this fix, Log Notes will remember the last saved state of the auto-correct option so that if a customer has opted for the auto-correct option, spellchecker will automatically correct words marked for "auto-change".
- Improved contrast on Player channel select buttons.
- Bright lights in Player channel select buttons stay on a little longer than before (added a peak level hold time and fall-off time, about 1 sec). Lights are more sensitive now, so will light up more with a quieter signal.

Important Note

- Install FTR Gold Monitoring Suite 6.3 before applying the FTR Gold Patch 6.3.10.
